WTS WATER TREATMENT

Universal treatment tanks with interchangeable coalescing media to suit all applications

Ideal solution when dewatering and dealing with stubborn suspended solids. The coalescing/lamella media provides a huge settling area and encourages settlement of all types of silt. Silt and Sludge is collected in the hopper and can be easily removed via the dump valve. Systems can be used with or without Flocculant. Media can be provided with varying diameter openings making the WTS the perfect system for any application. System can also be fitted with remote water quality monitoring systems and/or auto desludging pumps.

Lamella Coalescing media, can be used with Flocculant

Oil Skimmer & optional Hydrocarbon filter pads

Simple to set up, simple to empty, simple to operate

Solids emptied via dump valve for easy cleaning

AVAILABLE FOR HIRE OR PURCHASE
